LONG-RANGE IMAGING SYSTEM

## SONOMA DS/TS 200 LONG-RANGE IMAGING SYSTEMS

Sonoma's Model 12 DS/TS 200 is designed to meet the needs of law enforcement, paramilitary and surveillance applications on both rotary and fixed wing aircraft.

Through superior gyro-stabilization and long-range infrared optics, the Model 12 DS/TS 200 provides high-performance detection, recognition, identification and tracking of persons and vehicles over long distances in daylight, in total darkness, and in less-than-ideal weather conditions.

The small size and light weight of the Model 12 DS/TS 200 permit this system to be installed on a wide range of rotary and fixed-wing aircraft where compact, high-performance systems are needed. Through the SmartLink Interface Unit (SIU) the Model 12 DS/TS 200 system is compatible with other mission equipment such as microwave downlook equipment, searchlights, auto-trackers, moving maps, GPS, radar and intercom systems.
