**User/Installer Responsibilities**

It is important to understand that the existence of this document alone does not automatically constitute authority to install the aircraft engine/propeller/article.

Where the user/installer performs work in accordance with the national regulations of an airworthiness authority different than the airworthiness authority of the country specified in Block 1, it is essential that the user/installer ensures that his/her airworthiness authority accepts aircraft engine(s)/propeller(s)/article(s) from the airworthiness authority of the country specified in Block 1.

Statements in block 13a and 14a do not constitute installation certification. In all cases, aircraft maintenance records must contain installation certification issued in accordance with the national regulations by the user/installer before the aircraft may be flown.

12. Remarks:

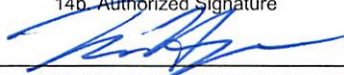

Authorized Release Certificate:

The above new component part(s) produced by PAH (TSO PT2024CE / PMA PQ2024CE) and is/are in satisfactory condition for installation.

The above new component part(s) received without FAA Form 8130-3.

Note: This certifies that the work specified in Block 11/12 was carried out in accordance with EASA Part 145 and in respect to that work the article is considered ready for release to service under EASA Part 145 Approval Number. EASA 145.4260.

Certifies that the work specified in block 11/12 was carried out in accordance with (UK) Part-145 and in respect to that work the component is considered ready for release to service under (UK) Part-145 Approval Number: UK 145.50083
